- Steam turbine blades (rotating and stationary)
- Rotor shafts
- Nozzles
- Diaphragms
- Bearings
- Labyrinths
- Casing
- Repairs and manufacture
- Balancing

Steamturbines

Quality Control

of Raw Materials and Final Products

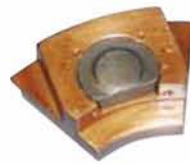

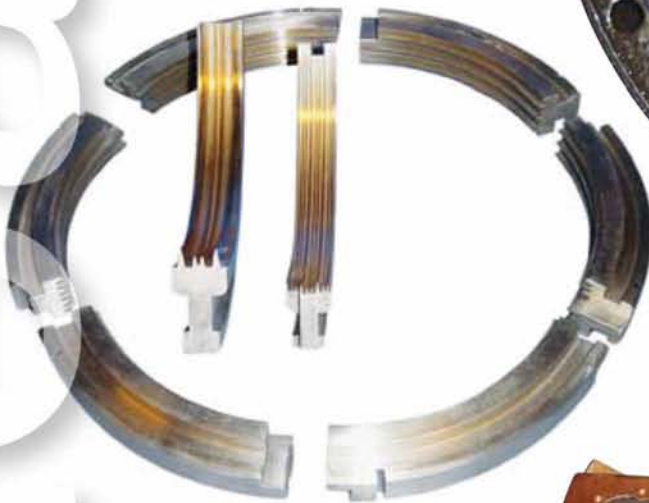

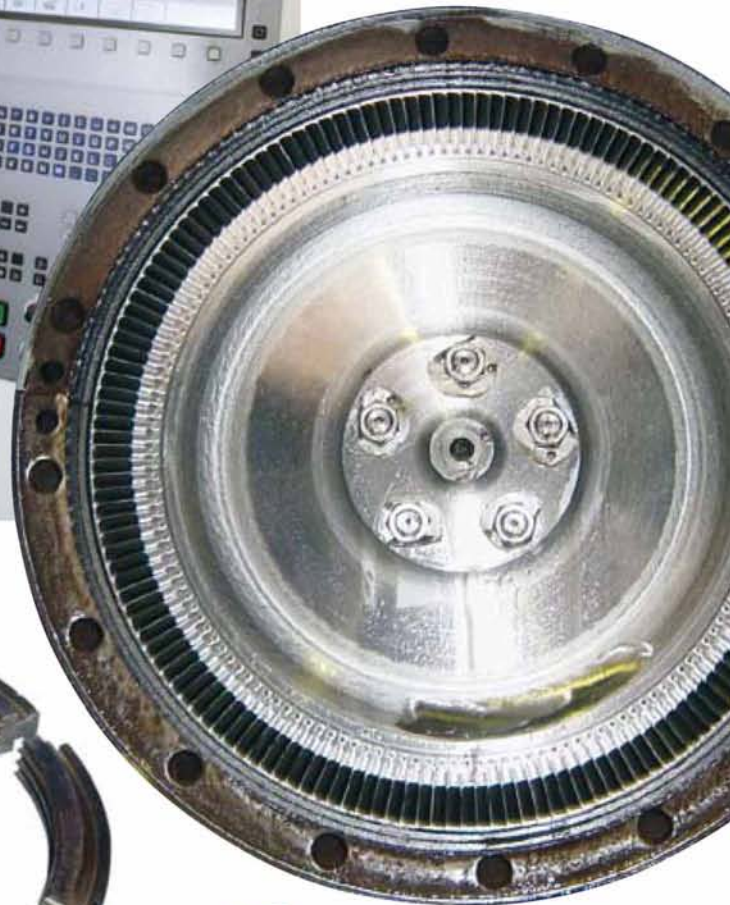

Raw materials are accompanied by required certification and undergo exhaustive examination by the company's quality control department.

All manufactured steam turbine parts are subject to a series of checks and non-destructive tests in order to ensure that they satisfy technical specifications.

STEAM TURBINE STARTERS

Quality Assurance

The system of quality control management applied by the company covers each step of the production that ranges from the arrival and testing of raw materials to the delivery of final products to the customer. The quality of our products is assured by the quality management system approved by the certificate ISO 9001:2000.
