

MARINE A/C & REFRIGERATION

WE CARE TO KEEP YOU COOL

Welcome to BREEZE

We are focusing on your satisfaction

BREEZE was incorporated under the laws of the United Arab Emirates in 2013 to provide complete solutions for **Marine A/C & Refrigeration Systems**.

Based in Fujairah, BREEZE carries out its primary operation in Emirates ports and it's geared to provide full support and technical excellence to vessels not only in the U.A.E. basin, but in whole Gulf region as well, 24 hours a day, 7 days a week, all year round.

BREEZE oversees the full life cycle of A/C & Refrigeration systems, from Consultancy, Design, Supply, Installation & Commissioning to Overhauling, Upgrading, Repair & Maintenance. We are fully capable to deal with any system, big or small, covering all major brands.

BREEZE technical department consists of fully trained and qualified teams of service technicians who can work with multi-brand A/C & Refrigeration equipment. Each team comprises technicians with diversified specializations and is able to effectively service any system, under any circumstances.

Our success is based upon our values
Overriding concern for Customer Satisfaction
Pursuit for continual improvement
Commitment to the highest level of ethical standards of business
Uplifting and well-being of our employees
Adherence to the law of preservation and to the protection of the environment

BREEZE mission is to be a world-class A/C & Refrigeration service provider and manage the complexity of your needs by providing innovative solutions to engineering challenges.

We will continue to grow, to enrich our technical knowledge and develop competencies among employees, in order to continuously assure your satisfaction through quality service workmanship.

You need inspection or routine maintenance of your plant?

We'll be there to protect your investment

Inspection

For close to the cost of one cylinder of new generation HFC refrigerant our highly skilled technicians will complete operational efficiency and integrity inspections on your A/C & Refrigeration units. They will identify leaks and system defects, they will test safety switches and pressure controls and they'll even fix manageable leaks then and there. They will evaluate overall system performance and will help you prevent costly system breakdowns in the future.

Preventive maintenance

BREEZE will provide you with a wide range of maintenance options and will support you to choose the solution that respects your budget and best fits your needs:

- Service on demand

- Tailored or Annual Maintenance Programs

With our intelligent preventive maintenance your plant's operation efficiency will remain at a maximum throughout its working life. This will also increase safety and minimize operational down time.

You experience failure of your Air Conditioning or Provision plant? We'll be there to provide high quality service in time and in budget

BREEZE operates through carefully selected service teams ensuring experienced technical support 24 hours, 7 days a week. Our strategic position guarantees on the spot technical assistance in Gulf region even at short notice and anywhere else when necessary.

When providing you with prompt cost-efficient service we always keep two things in mind: time is a crucial factor and goods are precious.

Our service staff are experts in their field, supported by experienced refrigeration engineers, and they are able to deal with all aspects of services such as repairs, replacement of A/C and refrigeration equipment, and refrigerant conversions.

Our comprehensive inventory of spare parts is crucial in allowing us to carry out our everyday work both quickly and to the highest of standards.

Whether it is the accommodation A/C plant, the ECR or the galley package unit, the provision refrigeration plant or the control air dryer of your vessel, our services will meet your needs.

The technical knowledge and experience of our service team ensures full compliance with the owner's specific requirements and strict conformity with specifications and rules.

In short, you can rely on BREEZE to deploy the know-how and expertise required to solve any air conditioning and refrigeration issue onboard your vessel.

We see complexity as a challenge

Need to rejuvenate or repair your compressor, or wish to exchange it?

We'll help you to choose the solution that best fits your needs and budget

A/C & Refrigeration compressors often work under heavy loads that can test the best of equipment. An overhaul by a Breeze professional returns your compressor back to peak condition to prevent breakdowns, maintain comfort, and extend the product life of your hard working equipment.

Wear parts are visually inspected for scuff marks, and dimensions and clearances are measured. Parts are cleaned, or replaced if faulty. A Breeze overhaul, therefore, eliminates the causes of deterioration resulting from aging, restoring the equipment to original condition.

A Breeze overhaul extends the equipment service life and assures many years of trouble-free operation.

And, in case of emergency, when there is no time for overhauling, we can always propose exchange of your compressor with a new or overhauled one.

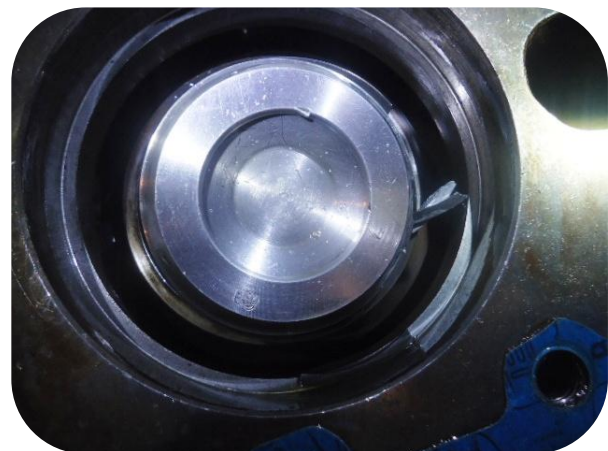

BREEZE ADVANTAGE

Overhaul open type and semi-hermetic compressors of all major brands

Accomplish the whole procedure, from compressor dismantling to final testing, in our own fully equipped workshop

Employ factory trained engineers and use high quality parts in order to restore equipment to manufacturing standards

Have difficulties in sourcing parts while in urgent need? We'll timely deliver on the spot

BREEZE keeps a comprehensive inventory of parts to support your A/C and Refrigeration units, available for immediate shipment anywhere in the world. From valves to compressors and motors, we are fully capable to provide parts and accessories for any system, covering all major brands.

Our inventory levels are closely monitored so that we can anytime provide you with the needed part that will keep your system running. Even if we do not have a part in our stock, we can rapidly source it from our well established suppliers' network.
